If the phone is indoors or in a place where it cannot directly see the GPS satellites, the system automatically uses alternative location technologies. In these cases, you may receive a location with an accuracy of a few hundred yards or more. When you request a location you will be given the best possible location fix given the conditions.</p> <p>In some situations, Sprint Family Locator will not be able to locate a phone. The most common reasons are:</p> <ul style="list-style-type: none"> • The phone is powered off. • The phone's battery has run out. • The phone is not in Sprint network coverage.” <p><i>(https://sfl.sprintpcs.com/finder-sprint-family/help.htm)</i></p>
